CAPABILITY STATEMENT

Custom. Durable. Site-Ready.

BOGMATS AUSTRALIA 2025

BOGMATS AUSTRALIA

TRUSTED BY BUILDERS, LIFT SUPERVISORS & SITE MANAGERS

Who We Are

Bogmats Australia (BA) specialises in high-end, fully customisable mobile crane bogmats that deliver maximum safety and ground stability on even the toughest worksites.

With a team built on industry-leading crane and lifting expertise, we provide tailored support across construction, infrastructure, renewable energy, and civil projects. Whether you're hiring for a short-term job or sourcing for long-term operations, we've got you covered.

**Superior Ground
Stability**

**Versatile
Solutions**

**Off-Set Load
Bearing Calculation**

**Custom-Made
For Your Project**

**Trusted Ground
Support Backed by
Crane Expertise**

**500+ Mats Delivered Across Projects
in Construction, Civil & Wind**

OUR PRODUCTS

STEEL BOGMATS

Our premium steel bog mats are engineered for exceptional performance and versatility in challenging environments. All Steel Bogmats comes standard with Engineering Certificate and complies with Australian Standard.

KEY FEATURES

- Available in standard sizes with custom options to suit specific requirements
- Forklift tine holes for easy handling and setup
- D-ring lifters rated for lifting sets of 4 mats simultaneously
- Tapered edges to prevent tire damage and allow placement against walls or obstructions
- Anti Slip Paint - On surface to enhance durability
- Versatile loading areas engineered for offset loads

TYPE	Length (mm)	Width (mm)	Height	Rating	Surface Area	Weight (kg)
Steel Bogmat	1200	1200	140	100	1.44	302
Steel Bogmat	1500	1500	140	100	2.25	451
Steel Bogmat	2000	1500	190	150	3	705
Steel Bogmat	2400	2000	190	200	4.8	983
Steel Bogmat	3000	2200	190	250	6.6	1515
Steel Bogmat	6000	2400	250	250	14.4	3553
Capping Beam	3500	700	350	200	2.8	2400

APPLICATIONS

These steel bog mats are ideal for:

- ✓ Crawler and mobile crane support
- ✓ Piling rig platforms
- ✓ Temporary access roads
- ✓ Ground stabilisation in various terrains

OUR PRODUCTS

TIMBER MATS

Our timber mats offer versatile solutions for ground stabilisation and equipment support across various applications.

These mats provide a stable, safe working platform for heavy equipment, helping to distribute weight and protect both the machinery and the underlying terrain. By choosing our locally sourced, sustainably produced timber mats, you're opting for an environmentally responsible solution that doesn't compromise on quality or performance.

Here are the key features of our high-quality timber mats :

Grade	Length (mm)	Width (mm)	Height (mm)
F17 Mixed Hardwood	3000	1000	200
F17 Mixed Hardwood	5000	1000	200
F27-F30 Spotted Gum	3000	1000	200
F27-F30 Spotted Gum	5000	1000	200

Custom Sizing

Available in standard or fully tailored dimensions to suit your site.

Sustainable Hardwood

Made from locally sourced, sustainably harvested Australian timber.

Durable Build

Heart-excluded timber, bolted construction, and galvanised lift points for strength and longevity.

APPLICATIONS

These steel bog mats are ideal for:

- ✓ Crawler and mobile crane support
- ✓ Piling rig platforms
- ✓ Ground stabilisation in various terrains

OUR PRODUCTS

POLY CRIBBING BLOCKS

Poly cribbing blocks made from Ultra-High Molecular Weight Polyethylene (UHMWPE) offer numerous advantages for outrigger pads.

KEY FEATURES

- Comes Standard with an Engineering Report confirming Load Capacity
- Built-in rope handles for safer handling.
- Flex slightly on uneven terrain to reduce breakage and improve stability.
- Tapered edges to prevent tire damage and allow placement against walls or obstructions
- Long-lasting and low-maintenance, ideal for high-rotation use.
- Fully customisable to suit your lift setup.

Length (mm)	Width (mm)	Height (mm)
1200	250	80
1000	200	80

APPLICATIONS

These steel bog mats are ideal for:

- ✓ Crawler and mobile crane support
- ✓ Piling rig platforms
- ✓ Temporary access roads
- ✓ Ground stabilisation in various terrains

OUR TEAM

INDUSTRY-LEADING CRANE EXPERTISE

Our team represents a high level of professional capability in crane and heavy lifting solutions, bringing together a comprehensive range of specialised skills and deep industry knowledge.
